

Training

Higher Education

The best workforce is a well-trained workforce. You want to know that problems will get fixed quickly and that everything possible is being done to prevent unscheduled downtime. The best way to achieve that goal is to work with a company that understands your needs. Oilgear has been supplying equipment and training to industrial companies around the world for over 85 years. That gives our instructors access to an extensive information library to insure that you receive the education you need.

We offer programs designed to fit your training requirements. The courseware will be configured to teach students about hydraulic components, circuits, and control systems as well as how to maintain the equipment and accurately diagnose problems. Schools can be held at your facility or at Oilgear's Milwaukee, WI headquarters. Training programs range from basic hydraulic and control to fully customized instruction covering the specific equipment and systems you have in your facility.

Call us to discuss how Oilgear's experience can be put to work for you.

Same quality. Same reliability. Better technology.

Oilgear
